Arm Immobilizer

- Innovative, adjustable **tri-strap design** for secure positioning:

Shoulder Strap –

Away from neck area
no neck strain.

Ensures desired fore-
arm elevation and
horizontal angle.

Under-Arm Strap –

Limits posterior
movement and
shoulder pain.

Back Strap and Sling –

Customizes fit to
optimize support.

- **Universal design** for either left or right arm.

INDICATIONS:

- Proximal humerus, AC joint, or clavicle fractures in acceptable position
- Reduced shoulder dislocations, rotator cuff or biceps injuries
- Post-op and injuries about the shoulder girdle for which immobilization is appropriate
