AIRCAST®
LLC

AIRHEEL™

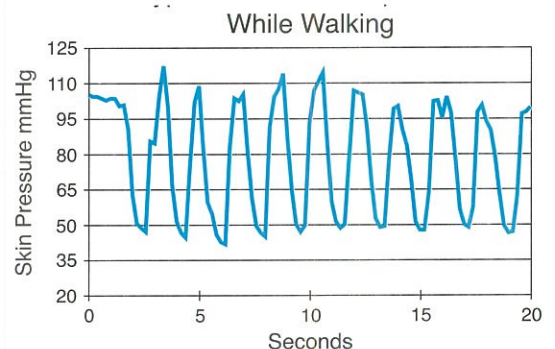

pneumatic compression dressing for the foot and ankle

An effective modality for the dynamic, functional treatment of plantar fasciitis and Achilles tendonitis. With each step, the Aircast AirHeel provides intermittent compression through an aircell under the plantar arch interacting with an aircell surrounding the Achilles tendon. These aircells produce pulsating compression during ambulation that helps minimize swelling and discomfort, and provides rapid pain relief.

INDICATIONS

- Plantar fasciitis
- Achilles tendonitis
- Heel pain
