

Drytex® Lateral "J" / Drytex® Hinged Lateral "J"

Indications

The tubular Lateral "J" buttress is ideal for supporting lateral patellar subluxation, dislocations or lateral patellofemoral malalignment.

Features and Benefits

- "J"-shaped buttress for patellar stabilisation
- Lateral to medial strapping for additional stabilisation
- Drytex material for patients with allergies or irritations to neoprene
- Also available in hinged version with aluminum malleable hinges for increased knee stability

Drytex® Adjustable Patella Donut

Indications

The Drytex® Adjustable Patella Donut constructed of a unique nylon core and polyester Lycra® fabric that allows for improved airflow. A trimmable full-circumference donut provides for patellar control. Ideal for patients who have neoprene-based allergies or irritations.

Features and Benefits

- Durable, lightweight, breathable fabric
- Trimmable tubular donut for desired direction of patella control
- Alternative to neoprene
